All Kids Count on the 2020 Census!

Your friends on Sesame Street know that making sure everyone gets counted on the 2020 Census is an important part of giving kids what they need to grow smarter, stronger, and kinder. But did you know....

Every kid that lives with you counts on the 2020 Census – that means your family and anyone else staying with you most of the time

Be sure to count all the kids living in your home, even if they’re not related to you or are only staying with you temporarily. That means all grandchildren, nieces, nephews, cousins, and the kids of any friends or housemates staying with you most of the time. Newborns count too – even if they’re still in the hospital.

If you’re not sure who counts, just include everyone who is staying in your home on April 1, 2020.

The 2020 Census helps support kids and neighborhoods for the next 10 years

Counting children helps determine how billions of dollars get spent in neighborhoods on things like hospitals, schools, and so much more! Kids left off census forms can miss out on a whole childhood of community support!

The 2020 Census is fast, easy, and totally private.

For the first time you can fill out the census online, over the phone, or by mail. It only takes 10 minutes and you can complete it anytime that’s convenient!
